Employment

Geo Decisions - Web Application Developer

December 2017 - December 2019 and September 2020 - Present

Geo Decisions, a subsidiary of Gannett Fleming Inc. Responsible for the development, implementation and maintenance of multiple geospatial applications used to map, track and manage PennDOT maintenance data. Working in small agile teams using latest development technologies to efficiently accomplish tasks. Utilizing Angular and Typescript for front end and .Net Core and GraphQL on the server.

Candoris - Software Developer

January 2020 - August 2020

Responsibilities include design and implementation of web applications and web API's, migrating customer data into the Salesforce CRM and configuration of clients' Salesforce environments. All work completed on time to a high level with regular client communication. Fast paced environment requiring the ability to manage multiple client workloads at the same time.

Integrity Landworks - Foreman

April 2015 - September 2017

As job foreman for Integrity my responsibilities were to ensure that the employees I worked with carried out their tasks adequately and that jobs progressed according to schedule. I had to work closely with and communicate effectively with my boss at all times, whilst also making sure that the customer was satisfied with work performed.
